

PNEUMATIC ACTUATORS

Series PRY

Structural Features

Design and Construction

PRY series pneumatic and hydraulic actuators provide global customers the latest valve actuation design. It is a highly unique and reliable means of operating ball, butterfly or plug valves with 90 degree rotating mechanisms.

Minimum Maintenance

Every PRY actuator is built to provide long and efficient service with minimum maintenance. The design, engineering and materials used in their construction ensure optimum performance even in the harshest environments.

Modular Design

PRY series actuators share a modular construction design. The centre body is available in six sizes. A pneumatic or hydraulic cylinder can be attached to either or both sides. A spring cartridge can also be fitted to either side for ESD (emergency shut down) applications. Modular construction and stocking of components facilitates quick delivery times.

Robust Yet Lightweight Design

Totally enclosed weatherproof center-body fabricated in carbon steel or ductile iron provides an excellent strength to weight ratio.

Complete Control Solutions

Air Control component packages are a part of any actuator/valve installation.

ProtACT has extensive experience in the design and assembly of all types of air control systems to satisfy any customer requirement for on/off, control or ESD service. Control units can be mounted on a panel or in a cabinet and placed either on the actuator or at a remote location.

Extensive Product Range

ProtACT offers the most extensive line of fluid power valve actuators. Products include low and high pressure pneumatic, hydraulic and pneumatic-hydraulic actuators.

Manual Override Options

A dependable manual override facility is an important part in many valve/actuator applications. ProtACT has a variety of override options available to meet any requirement.

Performance Characteristics

The pinion shape conforms to the latest standards of ISO5211, NAMUR. The dimensions can be customized and stainless steel is optionally available.

A Position indicator acc. to NAMUR is convenient for the assembly of accessories such as Limit Switch boxes or Positioners.

The dual-material (rubber and PFA) encapsulated O-rings can be applied to a wide range of temperature and conditions.

A double O-ring and bearing design ensures the stability and dependability of the modular cylinder.

PRV actuators offer torque outputs for spring-return models up to 110,000Nm and double-acting models up to 240,000Nm at operating pressures between 3-10 bar.

Operating temperatures:

Standard -20°C to +80°C

High Temperature -15°C to +150°C

Low Temperature -40°C to +80°C

Made from low friction, long-life compound material, to avoid any direct contact between metals. The maintenance is easy and convenient.

Mounting Flange according to ISO 5211

PY actuators are available with either B or C body modules.

B body modules provide a balanced torque ratio at both the break and end position.

C body modules have a torque advantage in applications where higher break torque is needed to unseat the valve and less critical needs at the run or full open positions.

Integral bi-directional travel stops, adjustable from -6° to 96° of total valve travel, assist the PY Series in prolonging valve seat integrity.

The torque of the springs can be customized to your needs.

Sizing

For optimum sizing of actuators it is useful to know the complete torque requirements of the valve. Specifically, these are the breakaway, the running and the setting torque for both pivoting directions.

■ Spring return operating curve

■ Air to spring operating curve

■ Ball valve (butterfly valve) operating curve

BTO of the ball valve is: 22000Nm
Air Supply: 4 Bar

Air Failure Position: Lock
Sizing: PRY.B3.561D

BTO of the butterfly valve is: 22000Nm
Air Supply: 4 Bar

Air Failure Position: Lock
Sizing: PRY.C3.501D

BTO of the ball valve is: 2400Nm
Air Supply: 4 Bar

Air Failure Position: Close
Sizing: PRY.B1.351S.04

BTO of the butterfly valve is: 2400Nm
Air Supply: 4 Bar

Air Failure Position: Close
Sizing: PRY.C1.321S.04

BTO of the ball valve is: 29000Nm
Air Supply: 4 Bar

Air Failure Position: Open
Sizing: PRY.B5.901S.04

BTO of the butterfly valve is: 29000Nm
Air Supply: 4 Bar

Air Failure Position: Open
Sizing: PRY.C5.801S.04

The dimension of D5 can be customized according to your requirements.

Module Design

The PRY series sets benchmarks with its versatile module construction. It can easily be converted from a single-acting to double-acting version or subsequently supplemented with a manual override option. Both the pneumatic and the spring modules can be easily disassembled without any special tools.
